

Leandro Maguela

Senior IP Network Engineer

- Kennesaw, GA, US
- leandro.nsn.maguela@gmail.com
- <https://www.linkedin.com/in/leandro-maguela/>

Summary

- Strategic and customer-centric Network Engineer with over 15 years of experience designing, delivering, and optimizing complex network infrastructures. Proven expertise in IP/MPLS architecture, VPN services, and end-to-end network implementation across Cisco, Juniper, and Nokia SR OS platforms. Adept at building low-latency, high-availability solutions that power mission-critical connectivity for global enterprise environments.

Skills

- **Routing Protocols & Network Solutions (15+ yrs):** Expert in BGP, OSPF, IS-IS, MPLS, VPN, EVPN, VXLAN, and QoS to build scalable, resilient networks.
- **Infrastructure Delivery (8+ yrs):** Led provisioning, testing, and CPE deployment for mission-critical environments.
- **Project Management (10+ yrs):** Managed end-to-end enterprise projects, client coordination, and technical documentation.
- **Tools & Automation (3+ yrs):** Automated processes with Python and Ansible; validated networks with Wireshark and IXIA.
- **Vendor Ecosystem (15+ yrs):** Deep experience with Cisco, Juniper, Nokia SR OS, and UNIX/Linux platforms.
- **Troubleshooting & Optimization (15+ yrs):** Resolved complex L1–L3 issues, reduced latency, and improved SLA performance.
- **Security & Compliance (5+ yrs):** Applied ISO standards, implemented firewalls, SecGW, IPsec, and network monitoring.
- **Soft Skills:** Strong analytical thinking, cross-team communication, documentation, and stakeholder engagement.
- **AI tools:** Base44, Google AI studio, Lovable, Google Colab, Fireblade Studio LLC, Antigravity.

Work experience

IP Resident Engineer

2026-01 – present

NextGen | GTA: A Kelly Telecom Company - USA

- Monitor end customer networks to identify alarms, potential configuration issues, and performance degradation; provide recommendations for upgrades or redesign of solutions as needed.
- Test new projects and network changes in laboratory environments prior to production deployment.
- Document all network changes and maintain up-to-date High-Level Design (HLD) and Low-Level Design (LLD) documentation.
- Plan, test, and develop Method of Procedure (MOP) documents for maintenance activities to minimize network impact.
- Design, implement, and support data center IP networks, including underlay and overlay architectures and integration with virtualization platforms.
- Configure, monitor, and troubleshoot IP networking technologies, including MPLS, OSPF, IS-IS, BGP, Segment Routing, and Traffic Engineering.
- Utilize AI-enabled monitoring tools to analyze network performance, detect anomalies, and proactively identify and resolve network issues.
- Implement and test Quality of Service (QoS) policies using industry-standard testing tools to ensure reliable network performance.
- Deploy, configure, and support Nokia networking platforms, including 7750 SR, 7250 IXR, 7705 SAR, 7210 SAS, SR Linux, and Nokia NSP.

Senior IP Network Engineer

2017-05 - 2025-08

Nokia Portugal

- Managed and delivered enterprise customer connectivity projects across 27 countries, ensuring on-time provisioning aligned with business SLAs.
- Responsibilities included project management, Unix systems integration, VPN configuration, and collaboration with telecom vendors for acceptance testing.
- Configured and tested IP/MPLS, IP Multicast, and BGP-based architectures across Juniper, Cisco, and Nokia SR OS platforms.
- Performed troubleshooting using Wireshark, and applied scripting to automate network administration tasks.
- Design and deliver customized network solutions aligned with customer requirements and business objectives.
- Collaborated with telecom providers to ensure successful link acceptance testing and effective incident coordination.
- Maintained accurate and updated records for customer equipment, configurations, and provisioning milestones.
- Developed technical documentation aligned with information technology compliance standards.
- Automated audit processes with Python and Ansible, reducing manual effort by 60% and minimizing errors.

IP Network Engineer 2008-01 - 2017-05

Nokia Brazil

- Supported network deployments and delivered connectivity solutions leveraging Cisco, Juniper, and Nokia technologies to meet enterprise-grade performance and reliability requirements.
- Conducted wireless coverage assessments, configured VLANs, and optimized Wi-Fi networks to enhance connectivity and user experience for large-scale enterprise customers.
- Authored and maintained comprehensive Network Design Templates (NDTs), enabling scalability, operational consistency, and faster deployment cycles.
- Enhanced network administration processes by standardizing IP Multicast and BGP routing configurations, improving network performance and operational efficiency.
- Delivered proactive Tier 3 network support, diagnosing and resolving critical routing and Layer 3 issues within four hours to minimize downtime and meet SLA commitments.
- Managed physical network infrastructure, including structured cabling projects, port allocation, and access control implementation, ensuring full compliance with ISO standards.

Education

Master of Science in AI

2025-09

Atlantis University

Miami - FL - US (Upcoming for 06/2027)

Postgraduate Degree in Network and Systems

End Date - 2015-12

National Telecommunications Institute - INATEL Rio

de Janeiro - RJ - BR

Bachelor's Degree in Telecommunications Engineering

End Date - 2002-12

Estácio University

Rio de Janeiro - RJ - BR

Certifications

- NSRII - Nokia Service Routing II
- NSRI - Nokia Service Routing I
- JNCIP - Juniper Networks Certified Internet Professional
- JNCIS - Juniper Networks Certified Internet Specialist
- JNCIA - Juniper Networks Certified Internet Associate
- CCNA - Cisco Certified Network Associate

Language

- English (Fluent)
- Portuguese (Native)
- Spanish (Intermediate)
